Computer Applications Pilot Program

Aidex Corporation and Applied Educational Systems (AES) are providing an opportunity for a limited number of schools to evaluate a newly developed, multimedia-based curriculum in the high demand area of Computer Applications.

The **ITCenter21: Computer Applications** laboratory system provides 180-hours of curriculum, covering the essential knowledge and skills based on ISTE's National Educational Technology standards. Students encounter a wide range of learning experiences, including teacher presentations and demonstrations, individual and group learning and practicing with computers and hands-on equipment, as well as classroom discussions and journaling. The WebTRAC laboratory management system monitors students' progress, grades and achievements.

The pilot program details are as follows:

- Aidex/AES will provide the IT*Center*21 Computer Applications software program and associated reference materials to the designated school at no cost for a period of six (6) months.
- Aidex/AES will install the program and provide toll-free 800# support during the evaluation period.
- Training is required for at least (1) instructor for (2) days to provide an understanding of the curriculum, management system, and support features.
  The cost for this training is $2,500.00. (Additional instructors will increase this amount.)
- The school will need to provide a suitable server computer to host the program, as well as medical supplies and equipment commonly found in a health care foundations lab.
- At the end of the evaluation period, the program and accessories will be removed, or the school will be given the opportunity to purchase the program at the standard pricing.

To take advantage of this limited offer or for additional product information, please contact Aidex Corporation by phone at **1-800-251-9935**, or email **lynn.crow@ffni.com**
